THE THACKERAY ALPHABET

By

WILLIAM MAKEPEACE THACKERAY

With Thackeray illustrations

"E. stands for Eddy, & for him I took
Pains to compose this entertaining book."

Such was Thackeray's own explanation of this little alphabet book, which he spent a day in designing for the small son of friends he was visiting. The original manuscript has been kept in a silk cover by the descendants of Eddy until now it is published for the first time. Children and grown ups will get many a laugh over the absurd verses and ridiculous illustrations made by one of England's greatest humorists.

We have tried to keep the spirit of the original, and the pages carrying the illustrations are facsimile reproductions of the manuscript.

How This Alphabet Came to be Written

NEARLY one hundred years ago my grandfather, Major James Chadwick, 59th Foot, was living with his wife and family at Sherborne, Dorset, where young Mr. W. M. Thackeray was wont to visit his friend Mr. Macready, the actor, also residing in that town. ¶One day, when Mr. Thackeray was calling on my grandparents, he was ushered in on a scene of woe, a small boy sobbing in a corner, with a stern mother in attendance. Kind Mr. Thackeray inquired the cause of the child's grief, and was informed that Eddy would not learn his alphabet. "No wonder," said Mr. Thackeray; "it is such a very dull thing to learn." Then he asked for some

notepaper, folded it carefully, and then and there composed and illustrated the following "entertaining book." ¶The alphabet was probably written about the year 1833. My father, the late Colonel Edward Frederick Chadwick, formerly of the 59th and 33rd Regiments, was born 3rd March, 1829, and would most likely have begun studying his ABC between the ages of four and five. Though we often heard the above story from his lips, it never occurred to any of us to ask the date of the episode. ¶How the frail little book survived the fingering of Eddy, who possessed a brother and five sisters, is a miracle. But I am sure that at least Eddy himself was allowed to learn from it, for to the end of his long life (he died in 1915, within a month of his 86th birthday) he was continually quoting the verses, especially the one underneath "P," which must have particularly taken his childish fancy. He counted

his Thackeray Alphabet among his most cherished possessions, and it still is kept in the little blue silk check case made for it by his careful mother.

I SPEND THE SUMMER

by

JAMES S. TIPPETT

Illustrated by

ELIZABETH T. WOLCOTT

Every youngster revels in the preparations for summer vacationing, and enjoys even the uncomfortable features of the journey. The author has the faculty for seeing things that interest small boys and girls from their viewpoint, and we feel that this little book of refreshingly different verses is, perhaps, the most appealing of any he has written. It is a companion volume to those two popular books—I LIVE IN A CITY and I GO A-TRAVELING.
